## 6. Future Equipment Planning

25X1 25X1	There are a number of alternative plans which may be applied to the operation for the future. The plans enumerated below are furnished morely as a guide. One such plan, or combination of plans, or, for that matter, some entirely new plan, may be evolved by the Chief of and his communications officer. It is felt here that the best plan will result if such plan is placed into effect by personnel on the spot. This is particularly true due to the dynamic political	
25X1	situation and indefinite future policy Below are listed	
	several generalized plans for your guidance.
